

Report of The Healing Miracle, Sunday 29th December 2019

The Healing Miracle occurred at the end of the New Group of World Servers 7-day festival. The festival being on the 21-28th December, culminating with The Healing Miracle on the 29th December. The Higher Dimensional Healing Foundation is a group that integrates with the New Group of World Servers through the service of humanity. Our work is based upon the teachings of the Tibetan/Alice Bailey and the healing is through time and space upon the etheric levels. Some of the group members are Arcane students, who participated in the 7-day meditation for Evoking the One Life and utilising the energies of Goodwill for healing.

Seventeen healers gathered physically at The Rose School, Kettering to transmit healing energy to those in need. This is an annual event that coincides with the festival of Christmas and the coming of the New Year. It is the ending of one cycle of the year and the beginning of a new one, through uplifting human consciousness and healing the physical, emotional and mental planes. This is in line with the Plan and bringing forward the Christ Consciousness to the hearts and minds of humanity. We met at 10am in the morning and began with insight and meditation. The energies built to lead into the Healing Miracle itself at 12 noon.

The Healing Miracle was advertised via Facebook. It reached 24,000 people across the world and an astounding 10,000 individuals consciously identified with it, plus families, institutions and communities. This is a major progression on previous years, where the reach was around 1,000 individuals. On Soul levels, the immensity of the response demonstrated that something is transpiring beyond our understanding upon the physical plane. We found it interesting that 6,000 of those that identified with The Healing Miracle were from the country Indonesia. So, of all the countries targeted, including the United Kingdom, United States, Australia etc.; Indonesia was the country that most responded from its reach. We pondered if there was a significance of this for the coming energies, in relation to the infiltration of love and light.

It appears that the identification to the group to be healed has transformed from healing individuals, to creating a group symbol or number, thus it's more abstract in its approach, beyond the logical mind. The Higher Dimensional Healing Foundation has evolved over 8 years and we are reaching out further to people and expanding our work. It is ever moving forward, creatively adapting and changing to the rapidly building energies. This is in line with the Hierarchy and inspiration via the Masters. This would relate to the group consciousness that is unfolding.

The reflections on the morning of The Healing Miracle began with a group pondering upon the etheric consciousness and the Planetary and Solar One Life. This was in relationship to Intelligence, Love and Will. We recognised the heart centre in communication with the individual and the greater life (i.e. the ashrams of the Buddhic Plane), through identifying with healing energies. The importance of the individual within the group life as a unity was acknowledged in relationship to attracting energies from etheric, solar and cosmic consciousness. This links Shamballa, Hierarchy and Humanity together, blending the three aspects of consciousness. All this is relative to healing of the lower three worlds of existence, bringing the higher energies into to the lower planes to uplift humanity. We focused upon the space and created a sphere for expanding the healing consciousness of the group, to radiate outwards. The Great Invocation was used to invoke the energies to achieve this.

The Healing Miracle sequence began with an inspired address from The Master Jesus, with insight regarding the group and the heart centre. The Healing Miracle proceeded with connection to the powerful energies as described. This was via etheric, solar and cosmic consciousness, the group soul and group to be healed (represented by a sphere). This created a triangle of energies via time and space to move outwards into the auric field and hands. The healing continued creatively and intuitively through the use of the third eye and hands.

A layout was created on the day (see image below). Each of the healers chose a crystal to include in the layout to enhance the energy transmission. The Healing Miracle poster was placed within the layout for identification to all those receiving healing and linking in.

This was a profound event, there was silence and contemplation within the group after the healing. The morning was reflected upon through the sharing of ideas and insights. It appeared from feedback after the event, that intention to receive is paramount within the evolving healing consciousness and the coming of the New Age.
