

## **Society for Enhancement of Quality of Life Vancouver, BC, Canada**

A series of events were held in Vancouver. William Meader kindly Zoomed in to give a brief talk and answer questions about the NGWS for one public event on Sunday, December 22. Here are a few comments from group members (SEQLights):

"My sense was that during our various events the group energy was focused and clear. I think SEQLights came away with a clearer understanding of who the NGWS is and its multidimensional purpose. William Meader's talk was perfect coming early in the week. He so clearly articulated that we are Servers first and foremost and how each of us can best serve the Plan. I think the members of SEQL who attended the various events got a sense of what the Festival is and how we are integral to it. Those who for various reasons did not attend the events, still were exposed to the idea of the NGWS and the importance of the Festival Week. I think our contribution was successful."

"The overall impression, for me, was that, the events helped rekindle both the group's and individual's awareness of the urgency of our participation in order to assist the works on the higher planes while living our true nature on this physical plane."

"I had a sense of "sacredness" over the week as well as personal responsibility. It was amazing!!"

"A thought form was operable in each of our three minds "How can SEQL be part of the Festival Week of the NGWS?". It was an email from F that activated the action. A meeting took place, a triangle was formed, a plan formulated, the energy focalized. We three became a channel through which the Festival Week energy could flow.

"Every SEQL course member who attended an event or read an announcement email was touched by that energy. Each individual heard the Call. Each decided for themselves to respond to the degree that was appropriate for them.

"Our actions connected us to the larger energetic action via the world wide network of esoteric groups. We took our place among the groups of similar intent. We shared a focus. SEQL stepped up in a new way to become a vital part of the larger energetic action."
